PROFESSIONAL SUMMARY

I'm Bilal Shahzad, a dedicated Dynamics 365 developer passionate about solving problems and improving business processes. I specialize in ERP customizations and have designed mobile apps, blending technical development with strong UI/UX design skills using Figma. My commitment is to deliver clean, reliable solutions that drive efficiency and enhance user experiences.

SKILLS

- **Languages:** AL, X++, C#, TypeScript, JavaScript, Python, SQL
- **ERP:** Dynamics 365 Business Central, Dynamics 365 F&O, Odoo, Customizations (Tables, Forms, Extensions, Data Entities), RDLC & SSRS Reporting, Power BI, Peppol E-Invoicing, REST APIs, Job Queue & Processing Logic
- **Front-End & Web:** React, Next.js, Vue 3, Vite, HTML, CSS, Responsive Design, SEO, Prisma, Azure
- **UI/UX Design:** Figma, Mobile App Design, Web Design, UI Design
- **Game Development:** Unity 6, C#, Android

WORK EXPERIENCE

Associate Technical Consultant, Tribox **Oct 2025 - Present**

- As an Associate Technical Consultant, I focused on backend development in Business Central, designed mobile applications with strong UI/UX principles, developed custom Odoo ERP solutions across multiple industry verticals, and gained experience customizing Dynamics 365 F&O components to support business processes.

Intern Technical Consultant, Tribox **July 2025 - Sept 2025**

- During my internship, I learned to develop and customize Dynamics 365 F&O components using X++ and AOT objects, applying Microsoft's best practices and design patterns.

PROJECTS

Business Central Development

Shop-in-Shop Retail Integration: D365 F&O to Business Central Migration | *AL, Business Central, REST APIs*

- Migrated a Shop-in-Shop retail module from Dynamics 365 F&O to Business Central (AL).
- Built 30+ REST APIs for handheld barcode-scanning operations: transfers, purchase receiving, wastage, and sales.
- Implemented Job Queue background posting and multi-company sales order creation.

POS Backend Project | *AL, Business Central*

- Developed a custom backend system for a retail POS app in Business Central using AL.
- Built API integrations, store and warehouse management, automated sales posting, and transaction synchronization.

Journal Access Control and Data Import Extensions | *AL, Business Central*

- Developed Business Central (AL) extensions providing batch-level access control.
- Built Excel-based import and export of journal data.

Multi-Currency Finance Extension | *AL, RDLC*

- Developed a 52-object Microsoft Dynamics 365 Business Central extension in AL.
- Implemented custom multi-currency exchange-rate handling.
- Added purchase classification with posting-time validation.
- Built RDLC financial reports.

E-Invoicing

E-Invoicing Extension, Business Central (UAE) | *AL, Peppol*

- Built an AL extension connecting Business Central to the Marmin Peppol e-invoicing platform.
- Automated sending of sales e-invoices, with compliance checks before posting.
- Matched received purchase e-invoices to purchase documents on supplier and VAT amounts.

Dynamics 365 F&O and Odoo Development

Dynamics 365 F&O Customizations | *X++*

- Customized and developed D365 F&O components including tables, forms, extensions, data entities, batch jobs, number sequences, and X++ business logic to support business requirements.

Odoo Custom Modules | *Odoo, Python*

- Engineered and launched a high-impact suite of Odoo custom modules covering Hospitality (POS), Healthcare (HMS/Dental), and Supply Chain Logistics (Freight Forwarding), plus a Power BI connector.
- Extended Odoo base models via inheritance, driving custom business logic directly into core frameworks including sale, account, hr, and stock.

UI/UX Design

SIS and HRMS Mobile App Designs | *Figma*

- Designed a comprehensive SIS app (Inventory Management) featuring sales processing, purchase receiving, purchase returns, and more.
- Designed an HRMS app with the same focus on functionality, all crafted in Figma for a seamless UX.

Web Application Development

Tribox Corporate Website (tribox365.com) | *React, Vite, Azure*

- Built and deployed a 19-page, responsive company website with light and dark themes, using React and Vite.
- Pre-rendered every page to static HTML with its own title and structured data for SEO. A shared template builds the service and product pages from content files.
- Added custom SVG diagrams, an interactive product tour, an animated office map and an accessible contact form.

Jewellery E-commerce Website | *React*

- Designed and built a live jewellery e-commerce website from scratch, handling product management, cart logic, a multi-step checkout, and real-time order notifications via WhatsApp.
- Currently serving real customers in Pakistan: mbn-store-pi.vercel.app

Sales Brain | *Next.js, TypeScript, Prisma*

- Built an AI-powered sales call intelligence platform that transcribes and analyzes sales calls using Groq's Whisper/LLaMA models, delivering coaching insights, pipeline analytics, and one-click CRM sync (HubSpot/Salesforce).
- Implemented secure multi-provider auth, team workspaces, and role-based access control end-to-end.

HRMS App | *React, TypeScript*

- Built a full-featured HR management web app with modules for employee directory, attendance, leave management, and an interactive analytics dashboard.

Booking Platform | *Vue 3, TypeScript, Pinia*

- Built a multi-tenant booking platform with a real-time admin calendar and customer self-booking flow.

Game Development

Ridgeline Stunt: 2D Mobile Stunt Game | *Unity 6, C#, Android*

- Built a 2D snowboard stunt game with 50 levels, flips, rail grinds, combo scoring and medals, released as an Android APK.
- Wrote a fixed-step physics simulation for riding, airtime, landings and crashes.
- Created a procedural level generator with difficulty that rises every level.
- Designed a responsive touch UI for phones in portrait and landscape.

F1 Racing: Mobile Racing Game | *Unity 6, C#, Android*

- Built a complete mobile racing game with 5 tracks, AI rivals, timed laps, replays and weather/day-night modes.
- Wrote custom car physics (tyre grip, downforce, braking), tuned to real F1 figures.
- Added gyroscope tilt and on-screen steering wheel controls with speed-sensitive steering assist.
- Programmed AI drivers with three difficulty levels, balanced through automated race simulations.
- Optimised a real-world circuit for mobile.

EDUCATION

Bachelor of Science in Computer Science, NCBA&E — **2020 - 2024**

Intermediate (FSc Pre-Engineering), The Crescent College — **2020**

Matric, St. Anthony High School — **2018**

CERTIFICATIONS

Full Stack Web Development, Ideoversity — **2023**
